Objective

To succeed in a stimulating and challenging industry environment, helping to build the success of the company while experiencing advancement opportunities, and learning how to apply and grow my skills in the industry. Specifically, I am searching for a STEM related role in areas in which I am skilled in, namely programming, software engineering, or web and mobile development.

Education

Currently studying in tenth grade at Thomas Jefferson High School for Science and Technology, the #1 rated high school in America per Newsweek. Some courses I have taken so far include AP BC Calculus, AP Computer Science, Artificial Intelligence (Post-AP).

Experience

- Founder of the tech startup Linkpedia- learn more about it at www.linkpedia.co. Currently, working on product development in a Django framework.
- Conducted research in cybersecurity, specifically to create chrome extensions in JavaScript to better detect phishing, with professors from the Indian Institute of Technology, New York University, and the State University of New York
- Interned at Enterprise E Support and helped create an enterprise and information management tool using the Apache Tomcat, JSP, and MySQL software stack
- Have conducted multiple years of research related to diagnosing glaucoma using the help of neural networks written in python and creating electronic devices that model photoreceptors.
- Participated at HackTJ, and created a project that helps students understand their programming errors
- President of talkTJ, a club in which students can request expert mentors for guidance on their project

Programming Skills & Abilities

- Skilled in Python, Java, JavaScript, and HTML and CSS
- Have worked with MySQL (connections from both Java and Python), the Apache Tomcat and Django frameworks, Node.js, MongoDB, Microsoft Access, and SQLite3
- Other skills include JSP, writing to and from XML and JSON files, Git, and Android Studio

Problem Solving

- Knowledgeable about important concepts in CS such as graph theory, tree searches, and encrypting and decrypting algorithms
- Written gameplaying AIs such as tic-tac-toe, sudoku, and Othello- code can be found on my Github above
- Participated in multiple programming competitions including The Virginia Tech Open, where our team placed in the top ten, and the American Computer Science League.
